4.8-9 Wildfire Hazards

Before Juniper Hills became a gated community the Raleys' employed a forester to patrol the general area where the Canyon Springs subdivision is planned. As the DEIR states, this is a "high fire danger area" and will become an even more dangerous area, if built, due to the increased population. Does Canyon Springs plan to hire a forester or some other type of security personnel to mitigate this inherent increased fire danger? Does Canyon springs plan to remove brush and/or thin trees to help alleviate some of this fire danger?
